CATIA User Skills Assessment
QUESTIONS & ANSWERS

Q1. Is there a cost for the Assessment?

The list price for the Assessment starts at $100/user and can be discounted based on volume.

Q2. Is the Assessment offered in other languages?

Currently it is only available in English, however based on the potential demand, we are exploring the possibility of releasing it in other languages including French and Spanish in the near term.

Q3. Is there a certification awarded upon completion of Assessment or training?

The Assessment is used to identify skill areas that require training and there is no formal certification based on the Assessment results. However, training provided by Inceptra can be very beneficial in preparing a user for the Dassault Systèmes Certifications.

Q4. Regarding the targeted training Inceptra recommends, what is the cost or is it specific to each company?

The training we recommend for each user will be based on the Assessment results. There are several training options including formal training, focused workshops, eLearning and direct consulting/mentoring. The cost will vary based on the training options you choose.

Q5. Is the Assessment available for CATIA V6?

The Assessment is currently available for CATIA V5, however we are developing an assessment for CATIA V6 and 3DEXPERIENCE for the near future.

Inceptra is the **ONLY**
North American
Dassault Systèmes
Gold certified Education Partner

GOLD CERTIFIED
3DS DASSAULT SYSTEMES
2019
EDUCATION PARTNER

Q6. Is there any part of the Assessment that involves CATIA usage?

The Assessment does not require the use of CATIA as it is being delivered today. The question format is multiple choice, true/false and matching. We are pursuing adding a hands-on portion in the future.

Q7. What is the cost of the online training option?

Inceptra offers Live Remote training which is instructor-led and requires the user to simply have an internet connection. We also offer eLearning which is a self-paced web tutorial training that a user can access 24/7 for ongoing training. Costs for either option vary based on the courses selected.

Q8. Do you have an Assessment for the Composites workbench?

We do not currently have an Assessment for the Composites workbench, however Inceptra has a very well-respected team of CATIA Composites engineers. We are investigating the development of a Composites-centric Assessment.

Q9. How long does it take to develop customized Assessments?

Creating a customized assessment based on our existing questions can be accomplished relatively quickly. We can also work closely with you to create specific questions related to your PLM environment which would require additional development time.

Q10. Improving user skills is good. Do you also have a best practices "handbook" to work with management?

Not specifically as part of the Assessment program, however best practices are a large part of our business model. If this refers to illustrating the value of the assessment to management, we can provide additional details to help you in that process. Contact your Inceptra Account Manager to assist you with either of these needs.
