

TODAY'S TEAM CHALLENGES

NO STRUCTURE

Operational team meetings **typically lack structure** and context

The majority of **meetings waste time** because they lack focus and structure to **drive specific outcomes** and actions

WRONG BEHAVIOR

Driving lean operational improvements **requires a change in team behaviors**

Traditional team interactions aren't truly collaborative and often **result in missed opportunities** and follow up

DISCONNECTED

Many teams work separately and **lack good working relationships**

Whether within or between teams, **the impact on business continuity is high** (especially in today's disruptive environment)

COMPLEXITY

Teams **don't like complexity**

Today's workers have enough challenges already – they won't adopt software or processes that aren't **simple to use and tailored to their needs**

TOP DOWN

Organizations enforce **"top down"** processes

Management dictates operational processes that **dis-empower teams and stifle innovation** that could otherwise be adding value to the organization

TOO MUCH DATA

Decisions need to be made using information **that isn't easy to visualize**

Teams need to **understand ever-changing product and process data**, KPIs and a myriad of reference information

TRANSFORM THE WAY YOU WORK

ENGAGE

Build better team relationships despite physical or organizational barriers

REVEAL

Visualize 3D content and data with a digital Lean framework

IMPROVE

Make 'Lean thinking' a standard part of business, teams and culture
